

BASIC CONSTRUCTIONS

Use a straight edge and a compass to construct the following.

1. Copy \overline{AB} .

Conclusion: $AB = \underline{\hspace{2cm}}$. Thus, $\underline{\hspace{2cm}} \cong \underline{\hspace{2cm}}$.

2. Bisect \overline{AB} . Label the midpoint M.

Conclusion: $AM = \underline{\hspace{2cm}} = \frac{1}{2} AB$.

3. Copy $\angle A$.

CONCLUSION: $m\angle A =$ _____
Thus, _____ \cong _____ by definition
of congruent angles.

4. Bisect $\angle A$.

CONCLUSION: By construction, _____ is the bisector of $\angle A$.
Therefore, $m\angle$ _____ = $m\angle$ _____ and
 \angle _____ \cong \angle _____.
